Workshop Topic:	AIDS
Date:	01/12/2018
Organized by:	NSS Unit I & II of Bhangar Mahavidyalay
Name of Resource Person:	<i>TWO RESOURCE PERSONS FROM SOUTHAN HEALTH IMPROVEMENT SAMITY (SHIS)</i>
Number of Participant :	72

REPORT

National Service Scheme (NSS) Unit I & II of Bhangar Mahavidyalaya organized a workshop on Aids Day dated 01/12/2018 to create awareness among the people about AIDS in which teaching and non teaching staff as well as volunteers of both units participated. Two resource persons from SHIS hospital have been invited to deliver lectures on aids in the College seminar hall. One of them has delivered a valuable lecture on aids and its symptom He has explained how to prevent aids and what are the symptoms of this dreadful disease while other resource person has discussed how to handle the situation if someone in the family suffers from the disease. He emphasized to maintain good health by saying health is wealth. The volunteers of the both units prepared posters and placard on the theme: causes of AIDS and preventive measures

Seminar Objectives:-

1. To raise awareness of the AIDS, its causes and how it spreads and how to protect during certain activities
2. Special focus was on the preventive measures and how to deal with this situation

Seminar Outcomes:-

1. Participants were introduced to know about AIDS and why it is dangerous for health from represented in various texts.
2. Topic discussed with reference to relevant text with special focus on the importance of preventive measures.
3. Newer perspectives with reference to digital rendition of texts discussed by resources persons.
4. Question/Answer Session

One Day State Level Seminar

Seminar Topic:	Our Earth: Many Challenges of Conservation
Date:	22 nd April 2019
Organized by:	IQAC of the College in Collaboration with Nature, Environment and Wildlife Society Kolkata
Name of Resource Person:	1. Dr. Manas Ranjan Roy, Chitranjan National Cancer Hospital 2. Prof. Ashis Biswas, Department of Geography, Bhangar Mahavidyalaya
Number of Participant :	

REPORT

A state level seminar on “**Our earth many challenges of conservation**” was organized by IQAC of Bhangar Mahavidyalay on 22nd April 2019. Resource person Dr. Manas Roy, Chitranjan Cancer Hospital has discussed in his valuable lecture that Contaminated water, soil, and air can harm or kill plants and animals, disrupt food chains, and lead to long-term environmental degradation. Pollution can also contribute to other threats, such as climate change and habitat loss, creating a complex web of challenges for conservation efforts. The current challenges in environmental conservation revolve around various issues such as climate change, habitat destruction, loss of biodiversity, pollution, and resource depletion. These challenges are often interconnected and can have far-reaching impacts on ecosystems, wildlife, and human communities.

Prof. Ashish Biswas, Dept. of Geography BhangarMahavidyalaya in his valuable lecture pointed out World Health Organization and UNICEF data which speaks that about 785 million people lack access to even a basic drinking water service and two billion people lack access to improved sanitation as simple as a pit latrine and three billion people lack a facility to wash their hands. As a result, nearly 829,000 people die every year from diarrheal diseases, and 297,000 of those deaths occur among children under the age of five.

India has only 4% of the world's fresh water resources despite a population of over 1.4 billion people. The crisis has especially worsened in the recent years due to climate change which results in delayed monsoons, consequently drying out reservoirs in several regions. Other factors attributed to the shortage of water in India are a lack of proper infrastructure and government oversight and unchecked water pollution.

Seminar Objectives

1. To address and protect natural resources, forests, wildlife, plants, and biodiversity.
2. Special focus on the preservation of the generation of resources for the future.

Seminar Outcomes

1. Participants are introduced to know why the protection of environment is important for the preservation of our earth.
2. Topic discussed about the prevention and control degradation of land, water, vegetation and air.
3. Newer perspectives of the awareness discussed by the resources persons.
